

# SitStand Solutions

An electric height adjustable **SitStand** desk delivers the user (whether home or office based) the benefits of both sitting and standing while they work. This shouldn't be news to anyone; in some European countries they barely offer static height desks in offices anymore, it's all about **SitStanding**.

Using a **SitStand** desk promotes good blood circulation, prevents problems associated with prolonged sitting and helps increase alertness and activity levels. It combats fatigue, raises productivity, improves mood and can help control weight! What more do you need?

Ergonomically, having bought one of our correctly specified, adjustable and supportive chairs your next step is to buy one of our electric sitstand desks to give you even more reasons to look forward to going to work!

Easy to use mechanism, ideally placed so the desk can be adjusted to the required height. Other mechanisms are available on request.

We now offer two operating systems: a single and a double motor version.

The **single motor** variety allows a width adjustment of 1000-1800mm and a height range of 690mm to 1190mm (to the underside of the top).

The **double motor** version allows for width adjustment of 1200-2000mm and height range of 615-1275mm (to the underside of the top).

There is a collision sensor available for the double motor frame but not for the single motor version.

We have a telescopic cable tray that works with both: for the single motor desk the cable tray fixes directly to the underside of the desktop; for the double motor version the cable tray fixes to the frame on designated fixing points

The single motor frame weight capacity is 80kgs and the weight capacity for the double motor frame is 100kgs. The frame can be supplied to you in a box for your self-assembly or it can be sub assembled by us for your ease of installation.

**We know people often reuse their existing desktop and we are more than happy to supply our frames without tops to suit**

If you have a situation where the end user doesn't want to buy a new electric **SitStand** desk but would like to offer the functionality, we can supply our desk mounted **SitStand** units as a happy halfway house solution.

The desk mounted **SitStand** unit can be supplied without a monitor arm to allow for laptop/remote keyboard set up or can be supplied with a single or double monitor arm for connection to your hard drive.

## Home

We have a **home version** available in white with a footprint of 800x600mm. Height range is 685-1185 and weight limit is 80kgs. This has become especially popular with the advent of hybrid working and where the space available for a desk is very small but critical to the well being of the user.

Our desk mounted **SitStand** unit can vary the desk height by 423mm which means if you allow for an average desk height of 700mm, our **SitStand** unit will give you a variance of 710-1133mm.

The overall width is 600mm and the depth varies from 840mm to 570mm in its fully upright mode, so it doesn't take up the whole desk like some of the other variable height desk modules do. Our desk mounted **SitStand** unit is available in white and can be placed on any solid surface to turn almost any area into a 'SitStand-able' work area. This is especially useful if you work from home or in a tight space. Standard leadtime is a week.

## Virtual Assessments

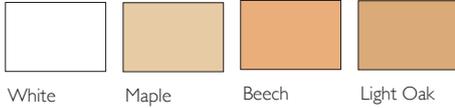

If you need a pre purchase **virtual workstation assessment** or any advice on homeworking, please arrange a call with one of our qualified assessors. We can help post purchase with set-up and installation advice too.

# SitStand desks and accessories pricing

## Tops

We have a stock line of 4 desk top colours (white, maple, light oak and beech) and in 4 sizes (1200x800, 1400x800, 1600x800, 1800x800 and all tops are 25mm thick). We can offer other colours and sizes and with the addition of port holes on a 3-week leadtime.
