

According to the Health & Safety Executive, businesses lose some 4.9 million working days due to work-related back pain every year with each affected employee taking an average of 19 days off work.

The charity, BackCare, estimates that the overall cost of back pain to the NHS, businesses and the economy is £5 billion a year.

Albion Chair's Spynamics range of office chairs incorporates a unique and innovative design to provide a complete solution to back problems in the workplace.

Spynamics Grande

Albion Chairs' comprehensive ergonomic solution to back pain in the workplace

Developed in conjunction with an industry leading osteopath, Stephen Green, the Spynamics (Spinal-Dynamics) range has fourteen models to suit users of differing shapes and sizes. Whether it's for a chronic or a mild back pain sufferer – each model is designed to ensure that each spine receives optimum support.

At the chronic end, the SD1 to SD5 models, provide our **unique triangulation of support** cradling the pelvis with the pelvic module and relieving the lumbar with the height adjustable curve adjustable lumbar control. At the mild end of the back pain scale, the SD10/11 and 12 chairs offer memory foam on the seat to help relieve the pressure from sitting for extended periods.

As Stephen Green, a former lecturer at the British School of

The Spynamics SD3

Osteopathy explains: "The pelvis is the foundation of the spine and if positioned correctly will help the rest of the spine align correctly. The Spynamics range boasts the use of the most up to date materials such as memory foam, made-to-measure seat sizes, a coccyx relief cut out, head and neck rests, multifunctional adjustable arms, and the heaviest duty ergonomic seat mechanism available".

Launched in 1999, Spynamics range is your one stop shop back care solution in the workplace.
