

Seat Options: Made-to-Measure Made Simple

SPYNAMICS has become synonymous with **ergonomic and orthopaedic seating** in the workplace since 1999. The result of **collaboration between Albion Chairs and a leading osteopath**, SPYNAMICS was developed for **users with chronic bad backs**. For the first time in the contract seating market, a combination of memory foam, a coccyx relief cut out, and combined pelvic and lumbar support was used. The SPYNAMICS range has continued to evolve as practitioners and dealers have provided valuable feedback and contributed to our knowledge pool. We have listened and integrated many new developments to **provide a comprehensive range of back care seating solutions suitable for users of all shapes and sizes**.

Albion Chairs believes that our bespoke seating provides a **level of comfort and support that is unrivalled in the industry**. Consequently, along with a choice of 14 back configurations and the **above 6 seat options**, you are able to configure and personalize any bad back chair **without extortionate costs or extended production lead times**.

Other ergonomic features include:

- The **6 way adjustable SPYNAMICS mechanism** provides forward tilting seat with independent back rake control, seat depth, adjustable weight control and ratchet backrest height adjustment
- **4 way adjustable arms:** one for height, one for forward and back, one for locking swivel and for width
- **Choice of colours** from the Camira Xtreme Plus and X2 fabric range
