

Albion Chairs Sellers' Guide
July 2024

made to measure made simple – off the shelf bespoke seating

Complete flexibility is the key to our collection. We offer the most comprehensive range of office seating options currently available from a UK manufacturer to suit all body sizes and office environments.

With Albion Chairs, our customers can select a made-to-measure chair at an off-the-shelf price.

An extensive collection of soft seating and visitors' chairs provides comfortable seating for the office environment away from the desk.

Albion Chairs has been delivering the complete seating solution throughout the office building since 1987.

The **SPYNAMICS** range is a specialist design built for users who suffer from back pain. The **SPYNAMICS** chair has been designed in a modular fashion ensuring that each of the key areas of the spine receive optimum support. Created together with the expertise of teaching osteopath Stephen Green, we have used state-of-the-art material technologies combined with the latest in adjustable seating controls to bring the concept of **SPINAL DYNAMICS** into the workplace.

The unique feature of **SPYNAMICS** is the **TRIANGULATION of SUPPORT** provided by the pelvic module cushion and the two way and pump lumbar combo. Together with the sacral thoracic pumps, these combine to provide ergonomic comfort that surpasses all other orthopaedic chairs.

The **SPYNAMICS** range of chairs promote correct seating posture and best practice thereby aiding those with existing back complaints as well as helping others to avoid potential problems.

Seating solutions for the chronic bad back sufferer; the occupational health professional, the access to work market and the everyday back care at work chairs

Virtual Assessments

If you need a pre purchase **virtual workstation assessment** or any advice on home working, please arrange a call with one of our qualified assessors. We can help post purchase with set-up and installation advice too.

SD1

P range

Price-conscious seating

The **P range** provides a compact range of operator, task seating with price in mind. Selecting the seating is a simple case of choosing no arms or a ring or a height adjustable arm; the functionality remains the same and meets the minimum VDU requirement in the workplace.

We haven't compromised on this UK manufactured chair; we still use the FIRA tested mechanical parts and it's guaranteed for 3 years; reduced to 1 year for 24/7 use. We have made savings by reducing the options available, and by using cut foams as opposed to moulded (cold cure) foams.

If you are looking for value for money and one of our UNI Bundles or Bespoke chairs does not meet your needs, then enquire about one of the **P range**.

• Height adjustable arms
• Black finish

COL 1 £209.65 COL 2 £222.18

stools, saddles and sitstand solutions

Not everyone works at a 720mm static height desk; a lot of people work at different workstations, benches, counters etc. They don't always work at computers typing on keyboards; sometimes they are working on an assembly line, in labs with microscopes, with money, with people's eyes, teeth etc and more and more people are sitting at (electric) height adjustable desks. The saddle seat enables the hip joint of the user to be kept at an optimal angle of 135 degrees which encourages the spine "S" shape posture and puts much less stress on the vertebrae and discs in the back.

The stools and chairs shown can provide an answer to these requirements (as well as) leg rests and can be sold as seen or with different spindles, castors, glides, footings etc to ensure the finished article best fits the needs of the user, their job and their environment (flooring etc).

For more information on the base configurations please refer to the options shown in the uni bespoke pages 6-7 or the summary on page 51.

TS1

14.5" (370mm) diameter stool

- Standard configuration with 9" spindle (other configurations available).
- Shown with black base (chrome and silver available).

COL 1	COL 2
£162.81	£170.56

£373.78	£386.19

TS6* 

Saddle stool with Tulip back

- Promotes correct posture with optimal pelvic/spine balance.
- Standard configuration with 9" gas.
- Shown with silver base and duo upholstery.
- Works well with height adjustable desking.

COL 1	COL 2
£393.83	£406.25

TS7 

Perching stool

- Designed specifically with sit stand desking in mind.
- Shown with 14" gas lift and metal 5 star base and glides.
- Other configurations are available.

COL 1	COL 2
£311.40	£319.15

TS100

Height adjustable heavy duty footrest

- Height is controlled by a foot operated gas lift.
- Ideal for counter height environments.

COL 1
£394.70

* Priced in black/extra for DU and VL base

new for the 2020's

TS9 

Has the forward tilting saddle seat as well as the lower back support backrest but also allows you to activate the seat height with your foot using the chrome ring integrated into the polished aluminium base. Comes with chrome finish and foot activated seat height actuator

COL 1	COL 2
£1145.40	£1157.81

TS10 

Introduces the split seat saddle with arm/backrest that allows for swivelling to reposition the rest to be an armrest, a backrest or a chest rest if leaning forward. The seat has the added feature of wobbling in a designed way, so you are never static. Comes with chrome finish as standard

COL 1	COL 2
£1087.90	£1100.31

TS12 

Introduces the stool that has a curved, weighted base to allow for perching from any angle or side. If you sit up at the high end of the travel more often, you might feel the need for the footing. Comes with higher gas lift and allows for wobbling forward and back in a dynamic seating style and works well with sitstand desks or where people might like to perch in their job.

Draughtsman footing add £60.45

£542.80
COL 2
£550.56

PUI* 

An ergonomic task chair for an industrial environment

The requirements for chairs used in industrial and technical environments differ from those for office chairs. Work performed in manufacturing workplaces involves the use of force, lots of standing, and recurring movements, and need to be durable, resistant to sparks and oils, easy to clean, and highly adjustable. The PUI chair is appropriate for this working environment and will support the employee in various working positions. Can be configured with draughtsman spindle and footing and different castors or glides if required.

9" Configuration £245.66
Draughtsman configuration £330.48

*PU = PolyUrethane

Visitor and soft seating

Over the next 24 pages we will present our offering of visitor's chairs whether steel tubular, solid wood or laminated wood frame, stacking cantilever, beam or education boardroom and even bariatric. Our range of coffee tables will start the soft seating section including tubs, settees, pouffes, modular seats and culminating with our new Acoustica range of booth seating. All frames for the soft seating (except some of the tubs) are made by us in our wood mill which enables us to offer you the ability to tweak and redesign our standard offering to suit your space planning better.

VENTURA

VENTURA

The V6, V14, V15 series of tubular frame chairs uses the same reliable frame which helps to reduce tipping and can be finished in black, silver, white* or chrome.

Dimensions

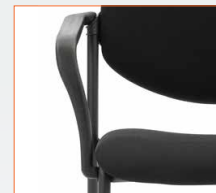

Seat Height: SH480mm / 450mm (without upholstery)
 Overall Width: W510mm / 590mm (with arms)
 Overall Depth: D555mm
 Overall Height: H815

Styles & Options

The series enables you to pick from one of 2 upholstery back styles - one square (VU15) and one round (V6) - a polypropylene back (V14) and a mesh back (VM15). The V14 chair can be supplied with an upholstered pad for the seat, the back or both.

Other options include PU (Polyurethane; soft plastic) and PP (Polypropylene; hard plastic) arms, writing tablets, linkings, document baskets and trolleys for when you need to stack away and move numbers of chairs.

These different styles and configurations complement each other and enable you to mix and match standard upholstery with rigid plastic or mesh

TROLLEY

Beam assembly

The functionality and adaptability don't stop there. For each style you can configure a beam assembly.

V6

VU14

VU14

VU15

VM15

With or without tables...

TAB

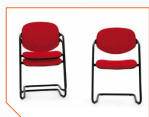

The beam can be specified to cater for 2, 3, 4 or 5 seats or combinations of seats and tables. For sizes and further options see page 6.

Stacking

And the choices don't end there. The frame has a mobile (caster) version, a cantilever which can be supplied without arms or can take either the PP or PU arms shown and there is a cantilever version which is an all in one stacking cantilever integral armchair.

The frames are available in the following colours:

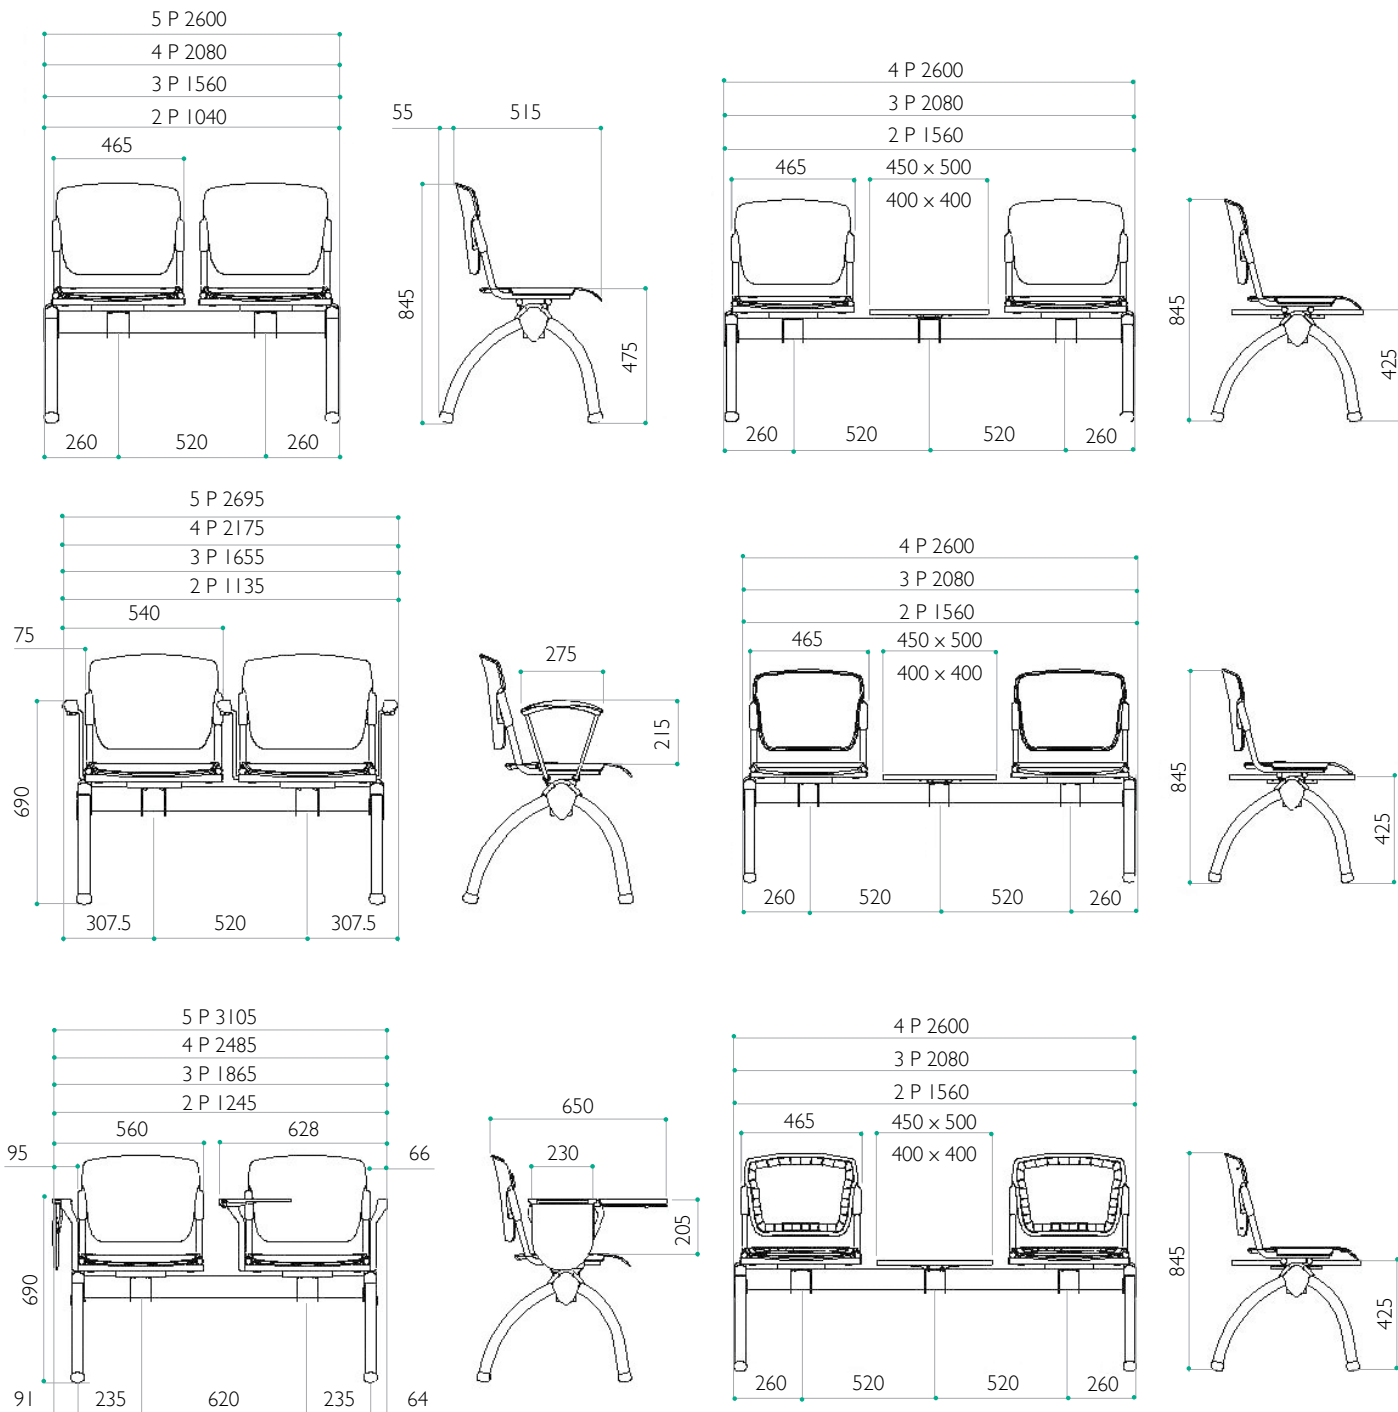

*White available on minimum order quantity.

Beam space planning

To price the beams you look at the chair top first. Using the example shown a VU15 with chrome finish, VU15X, in column 1 is £241.30 There are 4 of them therefore the chair tops cost £965.20

Next you add the cost of the beam @ £44.35 (standard issue is black). Then look at the legs and arms (if required) for the finishing of the beam assembly. If the legs are black there's no charge. If using chrome as shown you need to add £42.65

Therefore, the final price for the VU15X4STRX is £1052.20. Our equation for an N seater beam is (N x (equivalent single chair with added features (arms/finish if not black etc)) + £44.35 (beam) + Legs finish (£0.00 if black) + Arms (if applicable). Its footprint is 2080mm wide by 570mm deep.

V6

This range uses its own trouble-free, anti-tilt back stacking frame and can fit into almost all visitor requirements.

SETTEES

Our selection of settees come from a number of manufacture/design routes: as part of a family of 1,2 and 3-seater suites, 1 and 2 seater tubs, modular seat configurations from our new Acoustica range and one off specials for interesting space filling and seating exercises.

All the examples shown are made from scratch in our wood mill and can involve you and your own ideas as much or as little as you like; give us a rough brief, or a detailed floor plan and we can meet customer requirements in the most cost effective and space efficient way possible.

MODULAR

Our three main styles of modular seating provide a standard footprint of 600mm wide by 650mm deep. We make all our frames in house and can accommodate different sizes to suit your space requirements.

The RI has an all in one upholstery jacket, the FI series accommodates a replaceable seat if need be and the AR3 brings together a box seat with a shaped back for even more flexibility.

We offer three standard arms but we can accommodate your own designs if space or aesthetics requires it.

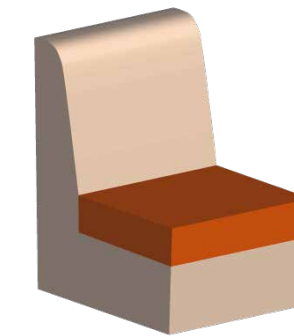

The images are purely to stimulate ideas and are not fixed offerings that cannot be modified, manipulated or redesigned to suit the space in question.

ACOUSTICA

Acoustica builds on the flexibility of the AR3 series by enabling you to build a large number of reception permutations from 5 unique pieces of upholstery.

The seat base unit (POU17) can be assembled with 2 back designs (H and T shown) and 2 arms which can perform either as an armrest or the side wall of a noise reducing booth.

Again, we have laid out a number of standard arrangements to stimulate ideas for the space you are planning to fill; this is not a static offering but one which can be modified, manipulated and redesigned to suit your needs.

SitStand Solutions

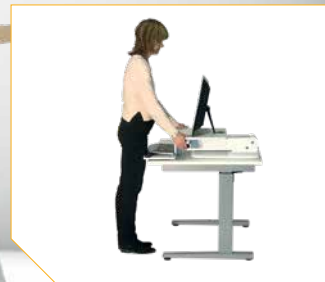

An electric height adjustable **SitStand** desk delivers the benefits of both sitting and standing while at work (whether at home or in the office). Using a **SitStand** desk promotes good blood circulation, prevents problems associated with prolonged sitting and helps increase alertness and activity levels. It combats fatigue, raises productivity, improves mood and can help control weight!

In short, standing for a period of time every hour really makes a difference.

Ergonomically speaking, having bought one of our made to measure chairs – whether one of our Synchronics or Uni Bundle chairs - working at an electric **SitStand** desk will ensure you get maximum benefit out of your chair as well.

Easy to use mechanism, ideally placed so the desk can be adjusted to the required height. Other mechanisms are available on request.

We now only offer a twin motor operating system.

Our stock option **double motor** version allows for width adjustment of 1000-1800mm and height range of 685-1185mm (to the underside of the top). It is a two-stage leg.

We have a cable tray that works with specific sizes of desk if required.

The weight capacity for the double motor, two-stage frame is 125kgs.

6-axis anti-collision software helps prevent accidents when you, or an item comes into contact with the desk.

The speed of rising/lowering is 40mm/second. Noise is less than 50 decibels. The desk frame comes with a basic up/down handset

The frame can be supplied to you in a box for your own self-assembly or it can be sub assembled by us for your ease of installation; it is always easier assembling the desktop to the assembled frame than trying to assemble the whole thing from scratch.

We know people often reuse their existing desktop and we are more than happy to supply our frames without tops at all.

We have a **home version** available in white with a footprint of 800x600mm. Height range is 685-1185 and weight limit is 80kgs. This has become especially popular with the advent of hybrid working and where the space available for a desk is very small but critical to the well-being of the user.

If you have a situation where the end user doesn't want to buy a new electric **SitStand** desk but would like the functionality, we can supply our desk mounted **SitStand** unit as an alternative solution.

The desk mounted **SitStand** unit can be supplied with or without monitor arm to allow for laptop/remote keyboard set up or single/double monitor arm for connection to your laptop.

Our desk mounted **SitStand** unit can vary the desk height by 423mm which means if you allow for an average desk height of 700mm, our **SitStand** unit will give you a variance of 710-1133mm. The overall width is 600mm and the depth varies from 840mm to

570mm in its fully upright mode, so it doesn't take up the whole desk like some of the other variable height desk modules do.

Our desk mounted **SitStand** unit is available in white and can be placed on any solid surface to turn almost any area into a 'SitStandable' work area. This is especially useful if you work from home or in a tight space.

Virtual Assessments

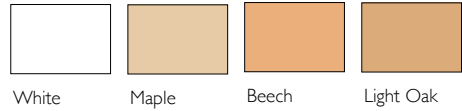

If you need a pre purchase **virtual workstation assessment** or any advice on homeworking, please arrange a call with one of our qualified assessors. We can help post purchase with set-up and installation advice too.

SitStand desks and accessories pricing

Tops

We have a stock line of 4 desk top colours (white, maple, light oak and beech) and in 4 sizes (1200x800, 1400x800, 1600x800, 1800x800 and all tops are 25mm thick). We can offer other colours and sizes and with the addition of port holes on a 3-week leadtime.

Prices start from £156.25

Please call the sales office for pricing.

dealer information

Albion Chairs has been supplying its quality, long lasting, heavy duty operator seating through its comprehensive UK dealer wide network since 1987.

If you need to find your nearest dealer, please call the office on **01494 464656**, or email us at **sales@albionchairs.com**.

Virtual Assessments

If you need a pre purchase **virtual workstation assessment** or any advice on home working, please arrange a call with one of our qualified assessors. We can help post purchase with set-up and installation advice too.

order acknowledgements and deliveries

All order acknowledgements show the Monday of the week commencing date; not necessarily that we are delivering to you on the Monday. We aim to deliver to you in person once every 2 weeks. Each Monday, we assess how best to make our delivery to you: whether we deliver in person, as a single chair in a box, or as multiple chairs on a pallet.

We can offer delivery direct services using our preferred suppliers: APC for a single chair in a box to a business address of £30 or a single chair in a box to a home address of £45 or between 2 and 10 chairs (depending on the chair) using Delivered of £65 per pallet.

Please note, if you want a Spynamics or Grande chair delivered direct to your customer from our premises, we only offer the pallet delivery service @ £65 per delivery. This cost applies for business and residential addresses alike.

If you need help with this, please call the sales office.

Sales@albionchairs.com, info@albionchairs.com or orders@albionchairs.com

Please ensure all orders are emailed to one of these generic email addresses because we all receive these emails. Personal emails only go to the addressee.

warranty information

No. OF USERS	No. OF HOURS PER DAY	ANNUAL HOURS	WARRANTY PERIOD 10,000 HOURS
SINGLE	8	2,000	5 YEARS
2+	24	6,240	1.5 YEARS

All Albion swivel chairs are FIRA tested to severe contract use. Our warranty period is 10,000 hours. You will see from the grid how this translates into years.

For single occupancy - up to 120kg (19 stone) - using the chair for 8 hours a day, 52 weeks a year, the warranty will be for 5 years. If the chair is to be used in a 24-hour environment by more than one user, the warranty period falls to 1.5 years.

fabric selector

Column	Camira
1	Citadel, Era, Gravity, Phoenix, Rivet, Target
2	Advantage, Aspect, Chateau, Main Line Plus, Quest, Replay, Sprint, Urban, Vita, X2, Xtreme
3	Main Line Flax, Nexus
4	Halcyon (Aspen, Cedar and Blossom), Hi Tech (anti static), Mainline Twist, Oceanic, Penta, Sumi
5	24/7 +, 24/7 Flax, Aquarius, Blazer, Hemp, Intervene (Texture), Kyoto, Regent, Silk, Synergy, Track
6	Deca, Yoredale,
7	Craggan Flax, Patternmaker
8	Layer, Revolution, Synergy Quilt 170 (channel, chevron and hourglass), Vintage

DISCLAIMER

We have developed different cutting patterns for our designs depending on the type of fabric; leather and vinyls need to be treated differently to regulation soft fabrics such as woolmix tweeds which in turn perform differently to the modern crepes. We will endeavour to cater for any differences as well as possible, but we cannot prevent the occasional ripple in some fabrics from time to time. If you would like our advice which fabrics perform better than others please feel free to ask.

For weight between 120 kg and up to 150kgs (23 stone) and for multi-user 24/7 applications, ie 5 and 1.5 years respectively; chairs using our heavy-duty mechanism such as UNIS7, 67, 77, 87 and 97 will be suitable.

If you need to consider weight up to 190kg (30 stones) we can only offer the Grande range with the same warranty period (5 and 1.5 years) based on the same parameters (single or multi-user occupancy).

If in doubt, call the sales office.

More than normal use but not 24/7 use

In your capacity as dealers, we know you may not always be able to ascertain how a chair may be used exactly and by whom. It is best to try to ensure any proposal you make can genuinely meet the requirements of 'fit for purpose'. If in doubt, you can come to us and cover yourself with our OW option. The OverWork option (OW) shown in the Uni bespoke pages (p4-5) is an extended warranty insurance and can be specified to provide an extra year of cover for any of these chairs or where it maybe unclear how a chair will be used, namely working hours in excess of 10 hours up to 24/7, more than one person using the same chair, or users where the weight is not known but in excess of 150kg. If in doubt, please call us for advice.

Fault reporting

If you do need to report a problem with a chair, it is better to provide photographs of the chair or parts in query and will make their resolution a lot more effective. We have been identifying our chairs with a warranty label since 1994. You will find this on the underside of our chair - usually on the mechanism. No warranty claims will be considered without this information. **NO LABEL NO WARRANTY.**

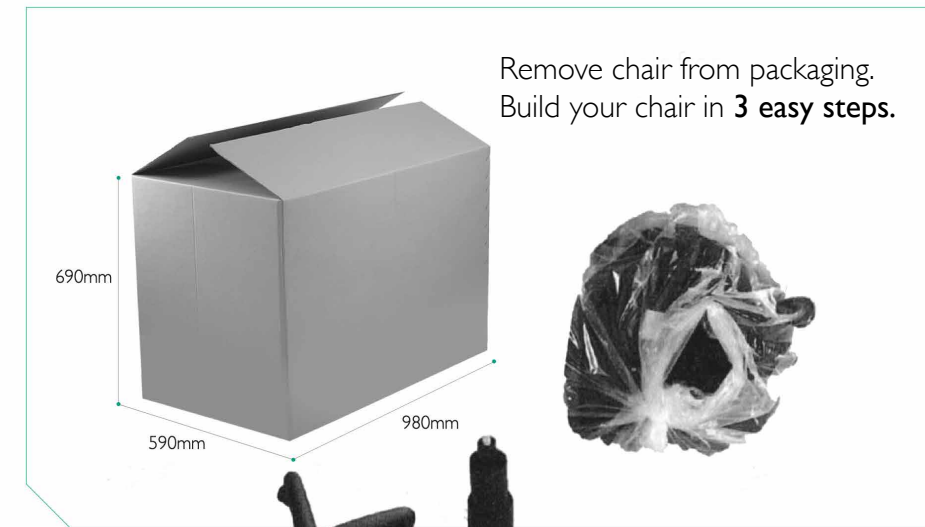

Fabric selector

Our main provider of fabrics is Camira Fabrics. Camira offer faux leather alternatives as well as a comprehensive selection of bull hides from their Vintage range. We can also provide options from Panaz or Chieftain for vinyls, PVC's and faux leathers as well as Yarwood, Bridge of Weir et al for leathers. Prices may vary depending on suppliers and metrages so please check with the sales office for any non-Camira fabric requests.

Hospital friendly

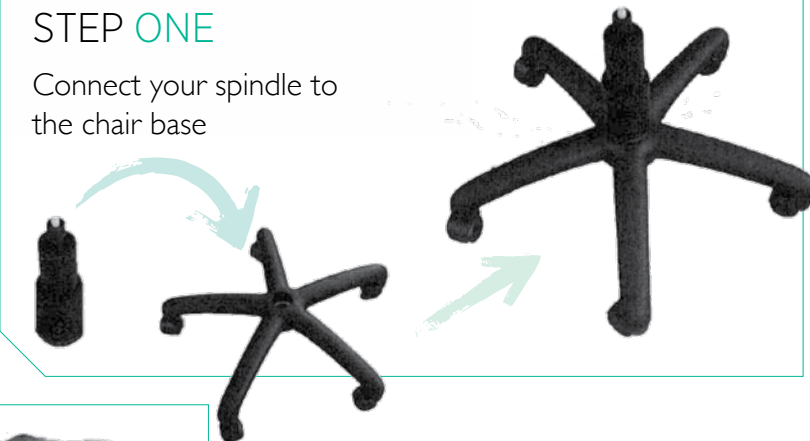

If you need hospital friendly coverings the main choices are Camira's Vita, Halcyon and Intervene.

assembly of boxed chairs

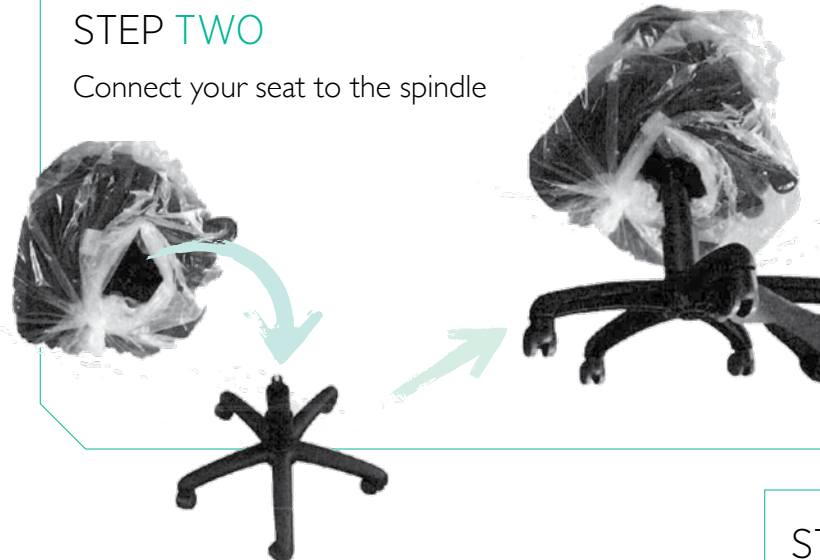

STEP ONE

Connect your spindle to the chair base

STEP TWO

Connect your seat to the spindle

STEP THREE

Sit on your Albion chair!
