

SitStand Solutions

An electric height adjustable **SitStand** desk delivers the benefits of both sitting and standing while at work (whether at home or in the office). Using a **SitStand** desk promotes good blood circulation, prevents problems associated with prolonged sitting and helps increase alertness and activity levels. It combats fatigue, raises productivity, improves mood and can help control weight!

In short, standing for a period of time every hour really makes a difference.

Ergonomically speaking, having bought one of our made to measure chairs – whether one of our Synchronics or Uni Bundle chairs - working at an electric **SitStand** desk will ensure you get maximum benefit out of your chair as well.

Easy to use mechanism, ideally placed so the desk can be adjusted to the required height. Other mechanisms are available on request.

We now only offer a twin motor operating system.

Our stock option **double motor** version allows for width adjustment of 1000-1800mm and height range of 685-1185mm (to the underside of the top). It is a two-stage leg.

We have a cable tray that works with specific sizes of desk if required.

The weight capacity for the double motor, two-stage frame is 125kgs.

6-axis anti-collision software helps prevent accidents when you, or an item comes into contact with the desk.

The speed of rising/lowering is 40mm/second. Noise is less than 50 decibels. The desk frame comes with a basic up/down handset

The frame can be supplied to you in a box for your own self-assembly or it can be sub assembled by us for your ease of installation; it is always easier assembling the desktop to the assembled frame than trying to assemble the whole thing from scratch.

We know people often reuse their existing desktop and we are more than happy to supply our frames without tops at all.

We have a **home version** available in white with a footprint of 800x600mm. Height range is 685-1185 and weight limit is 80kgs. This has become especially popular with the advent of hybrid working and where the space available for a desk is very small but critical to the well-being of the user.

If you have a situation where the end user doesn't want to buy a new electric **SitStand** desk but would like the functionality, we can supply our desk mounted **SitStand** unit as an alternative solution.

The desk mounted **SitStand** unit can be supplied with or without monitor arm to allow for laptop/remote keyboard set up or single/double monitor arm for connection to your laptop.

Our desk mounted **SitStand** unit can vary the desk height by 423mm which means if you allow for an average desk height of 700mm, our **SitStand** unit will give you a variance of 710-1133mm. The overall width is 600mm and the depth varies from 840mm to

570mm in its fully upright mode, so it doesn't take up the whole desk like some of the other variable height desk modules do.

Our desk mounted **SitStand** unit is available in white and can be placed on any solid surface to turn almost any area into a 'SitStandable' work area. This is especially useful if you work from home or in a tight space.

Virtual Assessments

If you need a pre purchase **virtual workstation assessment** or any advice on homeworking, please arrange a call with one of our qualified assessors. We can help post purchase with set-up and installation advice too.

SitStand desks and accessories pricing

Tops
